DETAILED ACTION

Allowable Subject Matter

1. Claims 1-18 and 33-37 are allowed.
2. The following is an examiner's statement of reasons for allowance: Although applicant's disclosure teaches that conventional machining, particularly hogout machining, removes at least about half the mass of the object, there is no indication that hogout machining and linear friction welding would be combined. Workpieces to be linearly friction welded are typically machined or formed close to the final dimensions prior to welding in a separate step so that a minimum of material (well under 50%) is lost after welding. See Yagi (USPN 4087038) and Fochtman (USPN 6079609). In the instant invention, the welding process forms the workpieces without this prior step such that minimal subsequent machining is required.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thomas et al. (USPN 5469617, rotary friction forming) and Kupetz et al. (USPN 6244492 B1).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynne Edmondson whose telephone number is (571) 272-1172. The examiner can normally be reached on Monday through Thursday from 6:30 a.m. to 5 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on (571) 272-1171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
